- a. **Grand Calumet River/Indiana Harbor Ship Canal Remedial Action Plan** – *Michael Spinar, IDEM*  
An Areas of Concern (AOC) Program was established by the 1987 Great Lakes Water Quality Agreement. 43 areas were identified in the Great Lakes Basin as needing high levels of remediation with Remedial Action Plans (RAPs) required to be established for restoring the beneficial uses of these areas. The goal of the Remedial Action Plan is to complete management actions that will lead to the removal of the 14 beneficial use impairments (BUI) identified and the areas of concern delisting. Current management actions being performed include sediment remediation, habitat restoration and management, beach restoration, and aesthetics monitoring. Next steps include finalizing management actions for the remaining 11 beneficial use impairments by 2020, completing habitat management actions by 2020 and monitoring restoration progress.
